

30 April 2021

Dear IASSW colleagues,

It is a pleasure for us to present you a new ICSW International Seminar, with the collaboration of IASSW, honoring the long tradition of both organizations of designing activities as equal partners. In this sense, IASSW members will have free registration by entering the following code in the registration system: **IASSW2021May**

Title: The role of ICTs for social inclusion and social welfare

The purpose of the international seminar “The role of ICTs for social inclusion and social welfare” is to explore a key phenomenon that has been accelerated by the COVID-19 crisis: the digitalization of our societies. And also one of its effects: the need to design inclusive social policies in a digital environment. Without digitalization there can be no inclusion, and the digitalization model we are implementing in our welfare systems will have lasting consequences. Digitalization represents a collective, global challenge that will redefine the relationships between users, professionals and the administrations or companies that provide welfare services. The objective of this international seminar is precisely to address these problems and challenges in greater depth, analyzing the role of ICTs for social inclusion and social welfare, and country cases of successful ICT application in the field of social welfare.

May 2021, 12 and 19
